

ARCHOIL AR2810 MAF SENSOR CLEANER

Over time, dust, oil and other debris accumulate on the MAF sensor, resulting in an incorrect metering of air flow into the intake system.

AR2810 MAF Sensor Cleaner contains a powerful blend of chemicals that safely and effectively remove deposits on the sensor, restoring correct air flow metering.

AR2810 will not harm MAF sensor wires or associated materials such as plastics or rubbers.

FEATURES / BENEFITS:

- 🔥 Rapid cleaning power
- 🔥 Leaves no residue
- 🔥 Restores lost engine power

APPLICATION:

Carefully disconnect and remove the Mass Airflow Sensor.

In a well ventilated area, carefully spray the sensor and filament wire until deposits are removed.

Do not touch the wire directly or agitate deposits.

Allow sensor to dry naturally and then reconnect.

Idle engine for 2-3 minutes before test driving.

PACKAGING:

300ml Aerosol
